press release

Renovo Selects Parasoft to Drive AUTOSAR C++ Compliance

Monrovia (USA) / Berlin - 26 May 2020 — Parasoft, the global leader in automated software testing, today announced that Renovo, the global automotive software and data company, has selected Parasoft's C/C++test and its Automotive Compliance Pack to aid the safe development, deployment, and operation of ADAS fleets at scale.

To learn more about this partnership, please register to attend a joint webinar on May 27 at 11 a.m. ET: [How Is the Testing and Deployment of Autonomous Vehicles Being Regulated?](#)

An innovator in advanced automotive data infrastructure, Renovo will utilize Parasoft C/C++test to achieve vital safety and quality goals for their data management platform used for ADAS unified solutions to ensure automotive software safety and security compliance. "Parasoft leads the software testing tools industry with the best support for AUTOSAR, CERT, CWE, ISO 26262, and MISRA," said Jason Stinson, Chief Technology Officer at Renovo. "Parasoft's solution offers support for these rules in ready-to-use test configurations with dedicated compliance reporting, which automatically generates the required documentation and significantly reduces the manual overhead of compliance activities, enabling automotive teams to achieve compliance faster and at a lower cost."

With Parasoft's offering, Renovo can reduce time to market by quickly achieving compliance through detecting bad coding practices, vulnerabilities, potential intrusions, and memory problems early in the software development lifecycle (SDLC).

David Hauck, Director of Embedded Sales at Parasoft, said: "Renovo is leading and enabling the future of ADAS at scale through its innovative and impressive technology platform. Parasoft shares Renovo's passion in creating best-in-class offerings. We're excited to be a collaborative partner in this mission to bring

about safe, secure, and reliable software to the automotive industry during this revolutionary transition to driverless vehicles.”

Parasoft C/C++test enables Renovo and its customers to develop software that is safe, secure, reliable and deployed to operate autonomous vehicles and advanced driver-assistance systems (ADAS).

Parasoft C/C++test:

Well established in the safety-critical market with better support for automotive standards than any other tool vendor, Parasoft’s [C/C++ development testing](#) solution integrates multiple testing technologies in one tool. This makes Parasoft tooling easier to adopt and it helps teams comply with automotive standards like AUTOSAR and MISRA. Customized compliance reporting and [advanced analytics](#) help teams pinpoint where to focus development efforts. Parasoft C/C++test is TÜV-certified for ISO 26262, AUTOSAR, MISRA and others, and comes with a dynamic qualification kit.

About Renovo

Renovo is an award-winning automotive software company. The Renovo Platform merges software, data management, and automotive-grade safety systems into a unified solution for ADAS fleets. Renovo combines Silicon Valley agility with proven automotive capabilities in a singular commitment to bring ADAS development to the greatest scale, highest safety and lowest cost imaginable. For more information, visit [Renovo.Auto](#).

About Parasoft:

Parasoft, the global automated software testing authority since 1987, provides innovative tools that automate time-consuming testing tasks and provide management with intelligent analytics necessary to focus on what matters. Parasoft technologies reduce time, effort, and cost of delivering secure, reliable, and compliant software, by integrating static and runtime analysis; unit, functional and API testing and UI testing with Selenium; and service virtualization. Parasoft supports software organizations as they develop and deploy applications in the embedded, enterprise and IoT markets. With developer testing tools, manager reporting/analytics and executive dashboarding, Parasoft enables organizations to succeed in today’s most strategic development initiatives – agile, continuous testing, DevOps, and security.
