Press Release

Parasoft Announces Partnership with Infosys to Unlock the Power of Software Test Automation

New strategic partnership will help organizations build and maintain stable, scalable, and comprehensive software testing strategies.

September 18, 2018 – Monrovia (USA)/Bangalore (Indien) - Parasoft, the global leader in software test automation for embedded, enterprise, and IoT markets, announced a strategic partnership with Infosys, a global leader in consulting, technology, and next-generation services. The partnership enables Infosys' clients to achieve reduced time-to-market by leveraging Parasoft's comprehensive automated software testing tool suite, ensuring quality at each stage of the SDLC. Parasoft focuses on helping organization scale their test automation practice, including tools for static analysis and unit testing for Java, C/C++, and .NET development, security testing, API testing, and service virtualization.

In today's competitive landscape, companies face immense pressure to deliver high-quality software quickly, and at a lower cost. This partnership will bring together Parasoft's technologies with Infosys' resources, helping customers successful face today's most strategic development initiatives — such as agile, continuous testing, DevOps, microservices and security.

"The Testing industry has evolved over time, with an increased need for speed and innovation. Through our strategic focus on building an agile future for our clients and energizing core services, we are enabling clients in their digital transformation and helping optimize time-effort through intelligent automation. Our partnership with Parasoft provides us the ability to take innovative solutions using the entire Parasoft tool suite to our clients and help them realize reduced release timelines and enhanced quality of delivery," said Narsimha M, Executive Vice President and Head – Infosys Validation Solutions.

"For the last year 30 years, Parasoft has been driving an industry focus on

software quality, with software innovations that bring efficiency and ease to time-consuming testing tasks," shared Elizabeth Kolawa, CEO of Parasoft. "Our alliance with Infosys furthers our mission, helping customers adopt and scale their testing strategies, enabling joint clients to leverage the respective expertise of both companies."

About Parasoft
 Parasoft's software testing solutions support the entire software development process, from when the developer writes the first line of code all the way through unit and functional testing, to performance and security testing, leveraging service virtualization along the way. Parasoft's unique analytics platform aggregates data from across all testing practices, providing insights up and down the testing pyramid to enable organizations to succeed in today's most strategic development initiatives, including Agile/DevOps, Continuous Testing, and the complexities of IoT. Parasoft's automated software testing innovations fuel software development organizations, helping teams reduce the time, cost, and effort of delivering high-quality software to the market.
